### Energy Management

Let us show you how to reduce room energy costs **35% to 45% ...**

Reduce wasteful HVAC consumption 35% - 45% by automatically adjusting “unoccupied” guestroom thermostats using wireless technology that is invisible to your guest.

Return on Investment (ROI) and average payback of less than 18 months (U.S.), and 6 to 8 months throughout the Caribbean.

Determine physical presence of guests in rooms by detecting infrared body heat.

Provides guests complete control of room environment while in the room.

Take control when guests leave the room, and reset temperature to energy conserving levels

Completely wireless and easy to install; superior battery life; uses the ZigBee wireless protocol

Connects to any HVAC system, including PTAC's, Split Systems, and Fan Coil Units of any voltage

Manufactured in the USA and sold through our network of certified dealers to hotel owners and management companies

#### About Lodging Technology

Caribbean Energy Savers is the unsurpassed leader in energy management solutions for the Caribbean hotel industry. For more than 20 years, we have helped hotels, motels, and resorts increase their bottom line profitability by bringing together leading edge technology and extensive experience in the lodging industry.

We offer comprehensive and customized solutions, and personalized services second to none. Although designed primarily for the lodging industry, our systems are equally applicable to other facilities such as school classrooms, college dorms, offices, conference centers, and military lodging facilities.
